

Hemo Control n.x.t Generation microcuvettes

- ◆ Simple sampling from any angle
- ◆ Low 8 μ l sample volume
- ◆ Convenient package sizes
- ◆ Bubble-free technology

| | | |
|--|--|---|
| <p>Precise sample collection</p> | <ul style="list-style-type: none"> • Only 8 µl of capillary, venous or arterial blood • Pre-filled cuvette with dry reagent • Blood drawn in by capillary action • Minimised risk of air bubbles gives consistent results | |
| <p>Individually packaged microcuvettes</p> | <ul style="list-style-type: none"> • Suitable for tropical conditions • Carton of 50. Ideal for mobile use and low volume sites • Each cuvette package contains its own desiccant • Low sensitivity to humidity • Operating temperature 15°C-40°C • Store at room temperature 15-30°C • Shelf life of 18 months |  |
| <p>Canister of 50 microcuvettes</p> | <ul style="list-style-type: none"> • Sealed canister with dessicant • Ideal for high volume sites • Operating temperature 15°C - 40°C • Store at room temperature 15-30°C • Shelf life of 24 months • Cuvettes stable for 3 months after opening when stored with the cap securely closed |  |

Testing in three easy steps

1 Collect blood sample.

2 Put microcuvette into analyser.

3 Result appears in 25-60 seconds.
